

193 Superior Impact™ Logo Mats

Custom printed with your brand and message

Stop dirt and debris while adding aesthetic appeal! These durable entrance mats can be customized with your brand and messaging.

The mat is made from a high-quality fiber with a heavy-duty vinyl backing that creates 100% surface-to-surface contact to ensure minimal buckling and mat movement. Ideal on smooth floors such as wood, marble, tile, and concrete.

- Mats are made to exact size—won't shrink
- State-of-the-art dye-injection process for long lasting, vibrant color that resists fading
- Color palette of 22 base colors
- 24 ounces of cut-pile nylon yarn per square yard provides increased moisture retention
- Custom sizes also available (minimum order required)

Mat thickness is 3/8 inch, ideal for medium traffic areas.

Vinyl backing increases surface friction to reduce mat movement.

Ask about our pre-printed mats!

194 Message Mats

195 Slogan Mats

Print process injects dye deep into the pile to keep color from fading.

To Order or to Receive a Quote:

1. Select size and orientation
 - Available sizes: 2x3-ft, 3x4-ft, 3x5-ft, 4x6-ft, 4x8-ft, 5x8-ft, 3x10-ft, 4x10-ft, 4x12-ft
 - Choose landscape or portrait orientation
2. Select background color from 22 base colors
3. Submit logo artwork and above information to customerservice@notrax.com
4. An artwork proof will be sent for approval; signed proof is required to place order.

File Requirements:

We require RGB, high resolution images. Vector graphic files are preferred, but raster images are also acceptable if at least 300 dpi.

Acceptable vector file formats: (to avoid losing details, all fonts must be converted to outlines)

- EPS
- AI (Adobe Illustrator)
- PDF

Acceptable raster files:

A minimum resolution of 300 dpi, or the exact dimensions of the mat, is imperative to print well on a large mat.

- JPEG/JPG - A widely used format, this has smaller file sizes but does not store a perfect copy of the image. We do not recommend using JPEG files for rasterized vector art, as the compression artifacts substantially degrade the quality of the image near the edges.
- BMP (bitmap image)
- TIFF/TIF

For artwork that does not meet the above requirements, we also offer graphic design services for an additional fee. Although we cannot guarantee an exact match for PMS or Pantone® colors, many digitally mixed colors are available.
